OUR REGIONAL OUTREACH

Our regional efforts from more than 500 programmes focus on these key areas:

Disaster Response and Emergency Preparedness

- Pre-Disaster Mitigation and Preparedness
- Post-Disaster Recovery
- Psychological Resilience

Healthcare

- Healthcare Leadership
- Nursing
- Public Health

Education

- Educational Leadership
- Science, Technology, Engineering & Mathematics
- Technical and Vocational Education and Training

Governance

- Financial Regulation
- Public Administration
- Urban Management

Dialogue and Exchange

- Influencers
- Leaders
- Youths

COVID-19 Initiatives Beyond Borders

Together with our partners, Temasek Foundation supported communities in the region through the provision of medical and essential items to cope with the effects of the virus. As one community, we came together to pool resources and efforts to support healthcare institutions to provide adequate care and for communities to stay protected and mitigate risks.

Indonesia

Masks, personal protective equipment, Polymerase Chain Reaction (PCR) test kits, and medical equipment were distributed to the communities and hospitals in Indonesia.

Philippines

More than 700 oxygen concentrators and 2 million reusable masks were provided for medical frontline workers and the community in the Philippines.

Malaysia

Some 5,000 cube tents were distributed to all Girl Guides Association Malaysia branches in Malaysia, as well as its network of partners and relief centres to help communities stay prepared in the event of natural disasters occurring.

India

The federal and state governments across India distributed more than 8,300 oxygen concentrators, ventilators, oximeters, and surgical masks for healthcare institutions and the community.

Disaster Response and Emergency Preparedness

FIELD HOSPITAL DESIGN AND MANAGEMENT FOR PANDEMIC RESPONSE IN SOUTH ASIA

To increase the resilience of healthcare systems in South Asia, Temasek Foundation partnered with Singapore Health Services to design a training programme on field hospital design and pandemic response management. The programme focused on the rapid response needed during the onset of a pandemic – particularly the set-up and clinical management of community healthcare facilities, hospital infrastructure design and facilities planning.

A three-day programme was conducted online in December 2021, covering topics such as Singapore's pandemic response and management, designing and managing temporary isolation facilities, and future facility design for unknown disease outbreaks. Some 120 healthcare professionals from India, Sri Lanka, Bangladesh, and Nepal participated in the programme.

Partner:
Singapore Health Services

SERO-SURVEILLANCE STUDY ON COVID-19 VACCINES

The COVID-19 global situation has heightened the need for countries to collaborate and develop a common knowledge and understanding of the best practices that can better prepare their communities to manage future pandemics.

The programme provides a platform for scientists and clinicians from various research teams and institutes in ASEAN to exchange knowledge on diagnostics and vaccines, including discussions on herd immunity, vaccination strategies, and immunity passport concepts.

Partner:
Diagnostics Development Hub, A*STAR Research Entities, Singapore

HOSPITAL MANAGEMENT PROGRAMME IN INDIA

The global pandemic has revealed the vulnerabilities of hospital management practices and patient safety across healthcare institutions globally.

To establish new systems and processes in the fight against infectious diseases, some 100 healthcare professionals will be trained in hospital infrastructure planning, design and flow, while senior leaders will enhance hospital management skills to improve patient care and safety in Maharashtra, India.

Partners:

Ministry of Public Health & Family Welfare, Maharashtra, India
Singapore Health Services

PUBLIC HEALTHCARE MANAGEMENT PROGRAMME IN UZBEKISTAN

Healthcare authorities in Uzbekistan are striving to improve the accessibility and cost-effectiveness of their primary healthcare system for their citizens.

Part of their plans include a programme for 175 Uzbekistan healthcare leaders and specialists to study operational excellence in urban healthcare. In particular, these leaders will learn more about Singapore's multi-agency approach to developing, governing, and transforming its urban healthcare management, and managing a network of polyclinics to provide accessible primary healthcare to the community.

Partners:

Ministry of Health, Uzbekistan
Nanyang Polytechnic International, Singapore

Education

INNOVATION AND CREATIVITY EDUCATION PROGRAMME IN CHINA

To support schools in developing future-ready students, some 120 Suzhou educators will be partnering fellow educators from Singapore to exchange knowledge and share insights on best practices in developing problem-solving skills and social-emotional learning.

This will help students develop competencies in problem-solving, socio-emotional skills and self-management through interdisciplinary project work.

Partners:

Suzhou Industrial Park Administrative Committee, China
NIE International, Singapore

TECHNICAL AND VOCATIONAL EDUCATION AND TRAINING (TVET) INDUSTRY 4.0 PROGRAMME IN THE PHILIPPINES

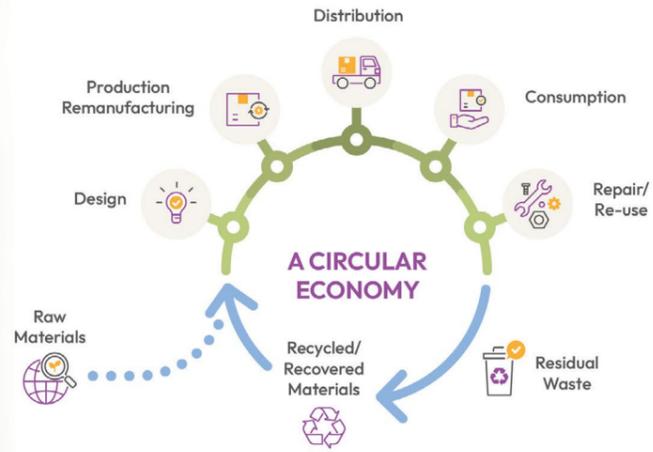

With digitalisation happening at an ever-accelerating pace, workers need to acquire new digital skills to cope with the fast-changing requirements of industry needs.

A pool of 100 education leaders and specialists from the Philippines will hone their leadership and technical skills and knowledge in Industry 4.0 to incorporate the key concepts and applications into the delivery of TVET curriculum. This will enable graduates to be better prepared and contribute towards digital transformation in the Philippines.

Partners:

Technical Education and Skills Development Authority, Philippines
ITE Education Services, Singapore

Governance

GREEN ECONOMY PROGRAMME IN INDONESIA

In line with Indonesia's emphasis on sustainable policies and practices, some 100 public officials will participate in a programme on green economy issues, covering topics such as closing resource loops, sharing technologies and options for waste management and clean energy.

These leaders will also explore opportunities for a circular economy to support the development of a high-level green economy roadmap for Indonesia.

Partners:
Ministry of National Development Planning, Indonesia
Singapore Cooperation Enterprise

FOOD SCIENCE AND TECHNOLOGY PROGRAMME IN THAILAND

To find common ground in food science regulations in the ASEAN region, food regulators and academic institutions from Singapore and Thailand will work on identifying current gaps and enhancing the science, technology, and regulatory knowledge.

The academic institutions will also jointly design a common curriculum on food regulation and develop a set of food regulation courses for food science technology.

Partners:
Kasetsart University Thailand
National University of Singapore - Department of Food Science and Technology

Dialogue and Exchange

YOUNG MEDIA LEADERS FELLOWSHIP 2022

An initiative of the World Editors Forum Asia Chapter, the Young Media Leaders Fellowship nurtures the next generation of media leaders through professional and cultural development.

In the 2022 programme, some 25 editors and journalists from newsrooms across the region will gather to share experiences, amplify the impact of news reporting, and learn to lead in an industry transformed by digital technology.

Partner:
WAN-IFRA Asia Pacific

FAITHFULLY ASEAN 2021

Given the challenges to regional social stability and security, it is important to seek common ground, deepen understanding, nurture friendships, and build fellowship among communities.

Faithfully ASEAN 2021 brought together 40 regional interfaith leaders, practitioners, and activists to exchange community-led initiatives, as well as experiences and challenges relating to intercultural and interfaith engagement, cohesion, and resilience.

This will help to foster deeper interfaith and intercultural understanding and inculcate shared values such as harmony and diversity.

Partner:
Humanity Matters, Singapore

ABOUT TEMASEK FOUNDATION

Temasek Foundation supports a diverse range of programmes that uplift lives and communities in Singapore and beyond.

Temasek Foundation's programmes, made possible through philanthropic endowments gifted by Temasek, strive towards achieving positive outcomes for individuals and communities now, and for generations to come.

Collectively, our programmes strengthen social resilience, foster international exchange and regional capabilities, advance science, and protect the planet.

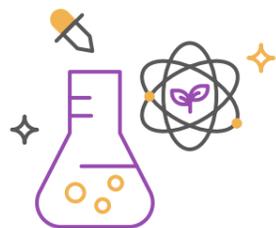

Strengthening Social Resilience and Uplifting Lives

We endeavour to build a more resilient, harmonious and inclusive society in Singapore. Our outcome-focused programmes help to enhance our social fabric by supporting individuals, strengthening families and uplifting communities. We pilot programmes and research as well as support programmes that promote culture, heritage and values to benefit current and future generations.

Fostering International Exchange and Enhancing Regional Capabilities

We connect people through programmes that promote dialogues, mutual understanding and a more inclusive worldview. Our programmes also advance capability and capacity in areas such as healthcare, education, public administration, urban management, and disaster response.

Advancing Science and Protecting the Planet for a Sustainable World

We champion sustainability and support research and education in science, technology, engineering and mathematics, and solution-oriented development projects that contribute to improving liveability. These programmes strengthen research capabilities and promote cross-functional collaboration in areas such as healthcare, education, climate change, wildlife conservation and the circular economy.
